May 13, 2025 (St. Louis, MO)—The Contemporary Art Museum St. Louis (CAM) will present a solo-exhibition of work by Los Angeles-based artist Teresa Baker, the most comprehensive exhibition of the artist's work to date. Baker, an enrolled member of the Three Affiliated Tribes in western North Dakota (Mandan/Hidatsa), brings a unique formal and material approach to the creation of abstract paintings that explore place, identity, and land. *Teresa Baker: Somewhere Between Earth and Sky* will be on view at CAM from **September 5, 2025 through February 8, 2026**.

Baker is celebrated for large-scale abstract paintings on irregularly shaped pieces of artificial turf. To make these works, she brushes and sprays acrylic paint onto this nubby surface, and introduces linear designs with natural and synthetic fiber yarns. Baker also affixes unexpected materials like willow, beads, buffalo and deer hide, tree bark, corn husks, and natural and artificial sinew into her compositions. The surfaces of her paintings dance with tactility and reward close looking. These dynamic and colorful artworks can resemble vast landscapes, inviting viewers to imagine prairie vistas and bird's-eye views of

grasslands, but they are equally resonant as inventive compositions uniting bold colors, drawing, and dynamic geometry.

“Baker is one of the most compelling and promising artists of her generation,” says Ferring Foundation Chief Curator Dean Daderko. “The scale of Baker’s work, her inventive material palette, and the animation she brings to painting through studied combinations of shape, color, and gesture will, I imagine, be heartily embraced by CAM’s audiences.”

Teresa Baker: Somewhere Between Earth and Sky combines a broad selection of the artist’s paintings with additional sculptures and drawings from her studio and numerous private collections. Woven willow baskets incorporating artificial turf and yarn will be presented along with a basket that has been cast in bronze and decorated with brightly-colored enamel paint. This exhibition also marks the first public presentation of the artist’s drawings, and includes a double-sided, suspended painting—a new type of work the artist recently began making.

Drawing from her Mandan/Hidatsa heritage, Baker’s singular vision of shape, color, and texture reveals abstraction’s narrative capacities with paintings that invite us to imagine new worlds and feelings. Through her work, Baker invigorates European and American modern painting histories, offering a visionary approach to abstraction.

Teresa Baker: Somewhere Between Earth and Sky is organized for the Contemporary Art Museum St. Louis by Dean Daderko, Ferring Foundation Chief Curator, with support from Grace Early, Exhibitions Assistant.

This exhibition is generously supported in part by Shereen and Michael Fischer, Penny Pennington and Michael Fidler, and the Whitaker Foundation.
